THE ORIGINAL
FROM MILAN
SINCE 1972

This models are high-performance semiautomatic heat transfer presses. Their **double support plate** allow you to work fast. While one textile is being printed you can already prepare the next one on the other plate.

LTS 238 SA + LTS 250 SA are ideal for transfer jobs onto both, large and small textiles, including t-shirts, sweatshirts, and sportswear. The **freestanding support plates** of each press allow you to mount textiles easily in a single layer; only the fabric segment to be printed rests on the support plate. Prints previously applied to the textile remain unaffected, and creases impairing the printing result (usually caused by two layers) are easily avoided. Pressure can be **continuously adjusted** by turning an easily accessible set dial.

With **swivel presses**, the heating plate can be swiveled to one side, so that the support plate is no longer covered by it. This simplifies your work process in two respects: first, mounting the textile is even more convenient, and secondly, you have a clear view of the entire textile, allowing easy positioning of the transfer.

The semiautomatic function will ensure an **automatically opening** after the timer releases. This helps in further respects: it's safer for the transfer and textile, because the press opens automatically. In addition this press is being equipped with a pre- and post-pressing button.

Fig. 1 - girlie plate, longish plate, umbrella plate and smaller square plate

Thanks to its **modular design**, only a single press is required to print shirts, jackets, bags, lanyard keychains, and even caps: a variety of support plates can be quickly and conveniently interchanged.

The clearly arranged digital display allows you to conveniently set and control transfer time and operating temperature.

High-quality **heating technology** provides quick warmup. Even and constant operating temperature is guaranteed as well as extended durability of the heating elements. The transfer process starts by pulling hand lever. The **digital temperature control** includes both audio and clear visual signals to indicate release time – making your work even easier.

Optional accessories

In addition to the original support plate, **support plates in other sizes** are also available. Popular sizes include **breast pocket format**, the **oblong format** for transferring onto sleeves and trouser legs, and the **rectangular format** for girlie t-shirts as well as a **format for umbrellas** (Fig. 1) or for **caps** (Fig. 2). We can also produce any customized dimensions to fulfill your requirements.
